Please Take Me

Afraid to Draw?

In the class, Illustrated Watercolor Journaling students learn how to pay attention to their world and see – then draw – things that are important to them. Anything might strike fancies – a child's soccer game, the first tomato of the season, or images from vacations. Life won't be boring again.

The workshop is recommended for artists and non-artists alike. It is a non-threatening, easy-going class that covers the basics of drawing, watercoloring and journaling.

The comment they hear most upon showing their journals is:

"I wish I could do that!"

Their answer is a resounding:

"You can!"

◆ Seating is limited, so register today!

For the over 10 years, amateur and professional artists Christina Lopp and Gay Kraeger have been teaching how to create a journal of your own on paper with drawings in pen, pencil and watercolors.

You can learn more by visiting their website.
